Dear Residents of:

Calyne Drive
Carlton Pace
Chadwick Place
Chandler Drive

Re: Underground Electrical Facilities

J. Fletcher Creamer & Son (“JFC”) and Public Service Electric & Gas Company (“PSE&G”) will be installing underground power lines in your development. You will soon see construction work related to this installation as JFC, an authorized PSE&G contractor, begins placing the buried pathway conduits for the new power lines. The entirety of the work is located on Chandler Drive and no disturbance will be made to the sidewalks or lawns behind the curb. JFC and PSE&G will work to minimize any inconvenience to you.

Please note that during the construction work, sections of Chandler Drive, Chadwick Place, Carlton Place and Calyne Drive will be closed for automotive traffic. JFC will be setting up detour signs that will safely navigate you to the nearest exit of the development. The detour signs will either navigate you to Fair Lawn Avenue or Pollitt Drive. Also, we ask for your cooperation as there will be “No Parking” sign posted in the area where the next day’s work will be taking place. The “No Parking” hours will be from 8am to 5pm and will be in effect for a few days in each area.

This work is scheduled to begin the week of April 8th and continue through to the beginning of May. The final restoration of the roadway will take place approximately sixty (60) days after the completion of work. Additional information relating to the construction work will be sent out at a later date.

If you have any questions please call **Gio Bermudez 908-986-5739** and/or PSE&G Underground Construction Specialist, **Chris Fuehrer 973-365-5361** (PSE&G address: 150 Circle Ave, Clifton NJ 07011)

Sincerely,

J. Fletcher Creamer and Son
