April 10, 2013

Dear Resident,

As part of the final phase of the infrastructure improvement project performed in the summer 2012, J. Fletcher Creamer & Son, Inc. has contracted Schifano Construction Corp. to perform the final paving restoration. Several streets are scheduled for milling (asphalt removal) and resurfacing (paving) as listed below. Please be aware you may encounter delays in your commute time during the milling and paving operations. We appreciate your cooperation during this project. While the actual paving portion of the operation is underway it will be necessary to entirely close the street to traffic. **Duration and timing of a paving project are difficult to predict. Please pay particular attention to the posted no parking signs for noted changes.** Following is the intended schedule:

All work is expected to be completed in one (1) day. The work at the moment is scheduled for **Monday April 15, 2013 weather permitting.** It is anticipated that the milling and paving will occur simultaneously with two (2) crews to ensure all work is completed in one day. The contractor will be working between the hours of **7:00 A.M. and 7:00 P.M., weather permitting:**

- Cadmus Pl., from Kipp St. to Bellair Ave.
- Bellair Ave., from Cadmus Pl. to Burke Pl.
- Burke Pl., from Bellair Ave. to Morlot Ave.
- 22Nd St. approximately 200ft North from Morlot Ave.
- Morlot Ave. from Burke Pl. to 22nd St. Morlot Ave. is the only road that will not be completely closed while the work is in progress. One or two lanes of traffic will remain open at all time.

As mentioned previously necessary date changes will be noted on the street posting signs. Inclement weather will delay paving time and or dates. Any unfinished street paving will commence on the next posted day.

During paving, vehicles **"WILL NOT"** be permitted to enter or leave the areas being resurfaced. Sections of the street will be posted for **"No Parking"** on the work day prior to paving. Please move your car out of the posted area to a nearby street **prior** to the commencement of work scheduled for **7:00 A.M.** Please consider outlying streets for parking. Area overnight parking restrictions will be suspended for this project. Roads will be reopened to traffic at the completion of daily work. *Emergency vehicles will have access at all times.*

VEHICLES PARKED IN THE POSTED "NO PARKING" AREA WILL BE TOWED BY THE POLICE AT OWNER'S EXPENSE.

Please contact the Fair Lawn Engineering Department at 201-794-5300 if you have special transportation needs that require vehicle access.
