

Homeowner Survey Responses 2012

In August 2012 the Borough Manager's Office sent out 10,467 Homeowner Surveys based on the database of homeowners in the Borough. The surveys were supposed to be returned by 10/1/2012. Total to date we have received back 2,240 surveys for a 21.4% response rate. The following charts and comments are the results of those surveys. In addition, we are in the process of tabulating all hand written comments from the survey respondents and will provide that information shortly.

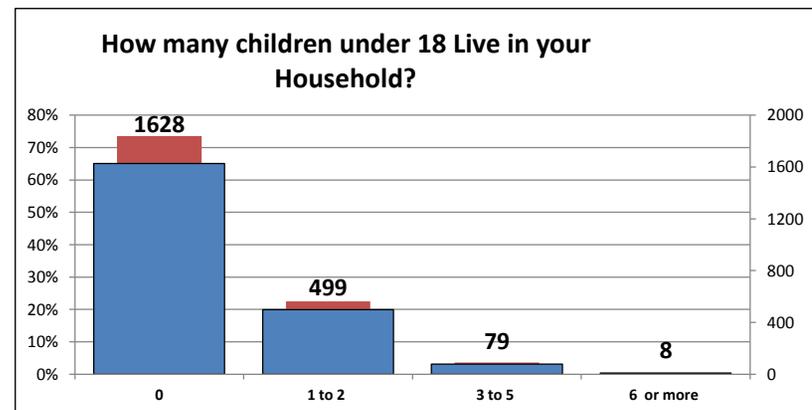

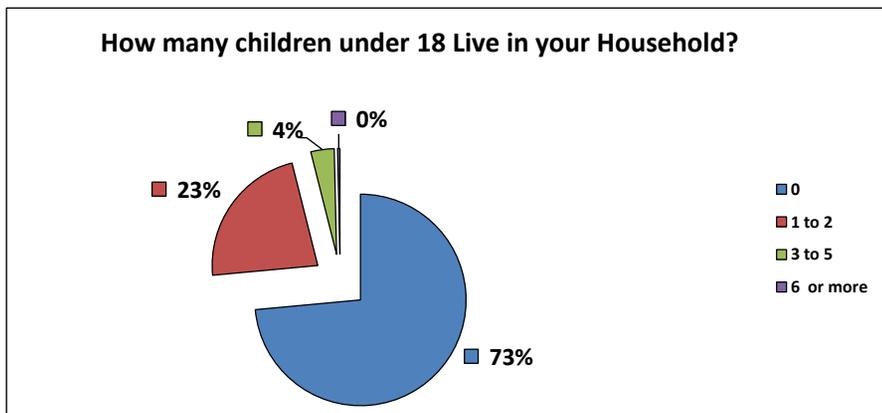

*** Please note in all cases, if the respondent answered a question using the number scale of 1-7 and answered a question using the number 4, that data is not in the highlighted yellow comments under each chart. Those numbers are reflected on the accompanying chart.**
